

Surge Protection

for Low Voltage Power Systems

2013/14

ISKRA ZAŠČITE

BE ON THE SAFE SIDE

Dr. Otmar Zorn

PRESIDENT'S FOREWORD

Dear Reader,

We are pleased to introduce our 2013 catalogue of Surge Protective Devices (SPDs) intended for use on low voltage power distribution systems. This edition presents many new products and innovations, including the patented SAFETEC® and ProGRID® series which we believe are revolutionizing safety and performance in the power quality industry.

ISKRA ZAŠČITE is a leading designer and manufacturer of surge protection products with a strong customer-oriented culture fostered throughout the company. We believe a comprehensive understanding of our customers' needs and of the industry in which they operate is crucial to our ability to develop effective products and solutions.

Our success in bringing you the best products we can, is driven by our people and their commitment to excellence. These attributes are encouraged in all aspects of our operations - from our qualified research and development engineers many of whom hold higher degrees, to our dedicated manufacturing staff and continuing education programs which ensure skill-sets keep pace with our newer process control capabilities and automated test equipment.

As a leader in our industry, we believe we share responsibilities beyond those we owe to our customers and partners (to ensure our dealing adhere to the highest standards of business integrity) and beyond those we owe to our employees (to ensure a safe and pleasant working environment), but we also owe an obligation to care for our environment and to minimize the impact we have upon it.

We are proud of the many ways in which we work to safeguard this. Our products are RoHS compliant, our manufacturing facility is currently ISO 9001 certified and we are now in the advanced stage of moving towards ISO 14001. We also believe that we owe an obligation to give back to our industry as a whole. This we do through such activities as educational seminars and participation in standardization committees.

With our strong customer focus, stringent quality measures, compliance to relevant safety and performance standards, comprehensive testing and manufacturing facilities and good relations with suppliers, we are reassured that ISKRA ZAŠČITE and its products are well placed to face the demands of our evolving electrical industry with its growing sensitivity to overvoltages surges and transients.

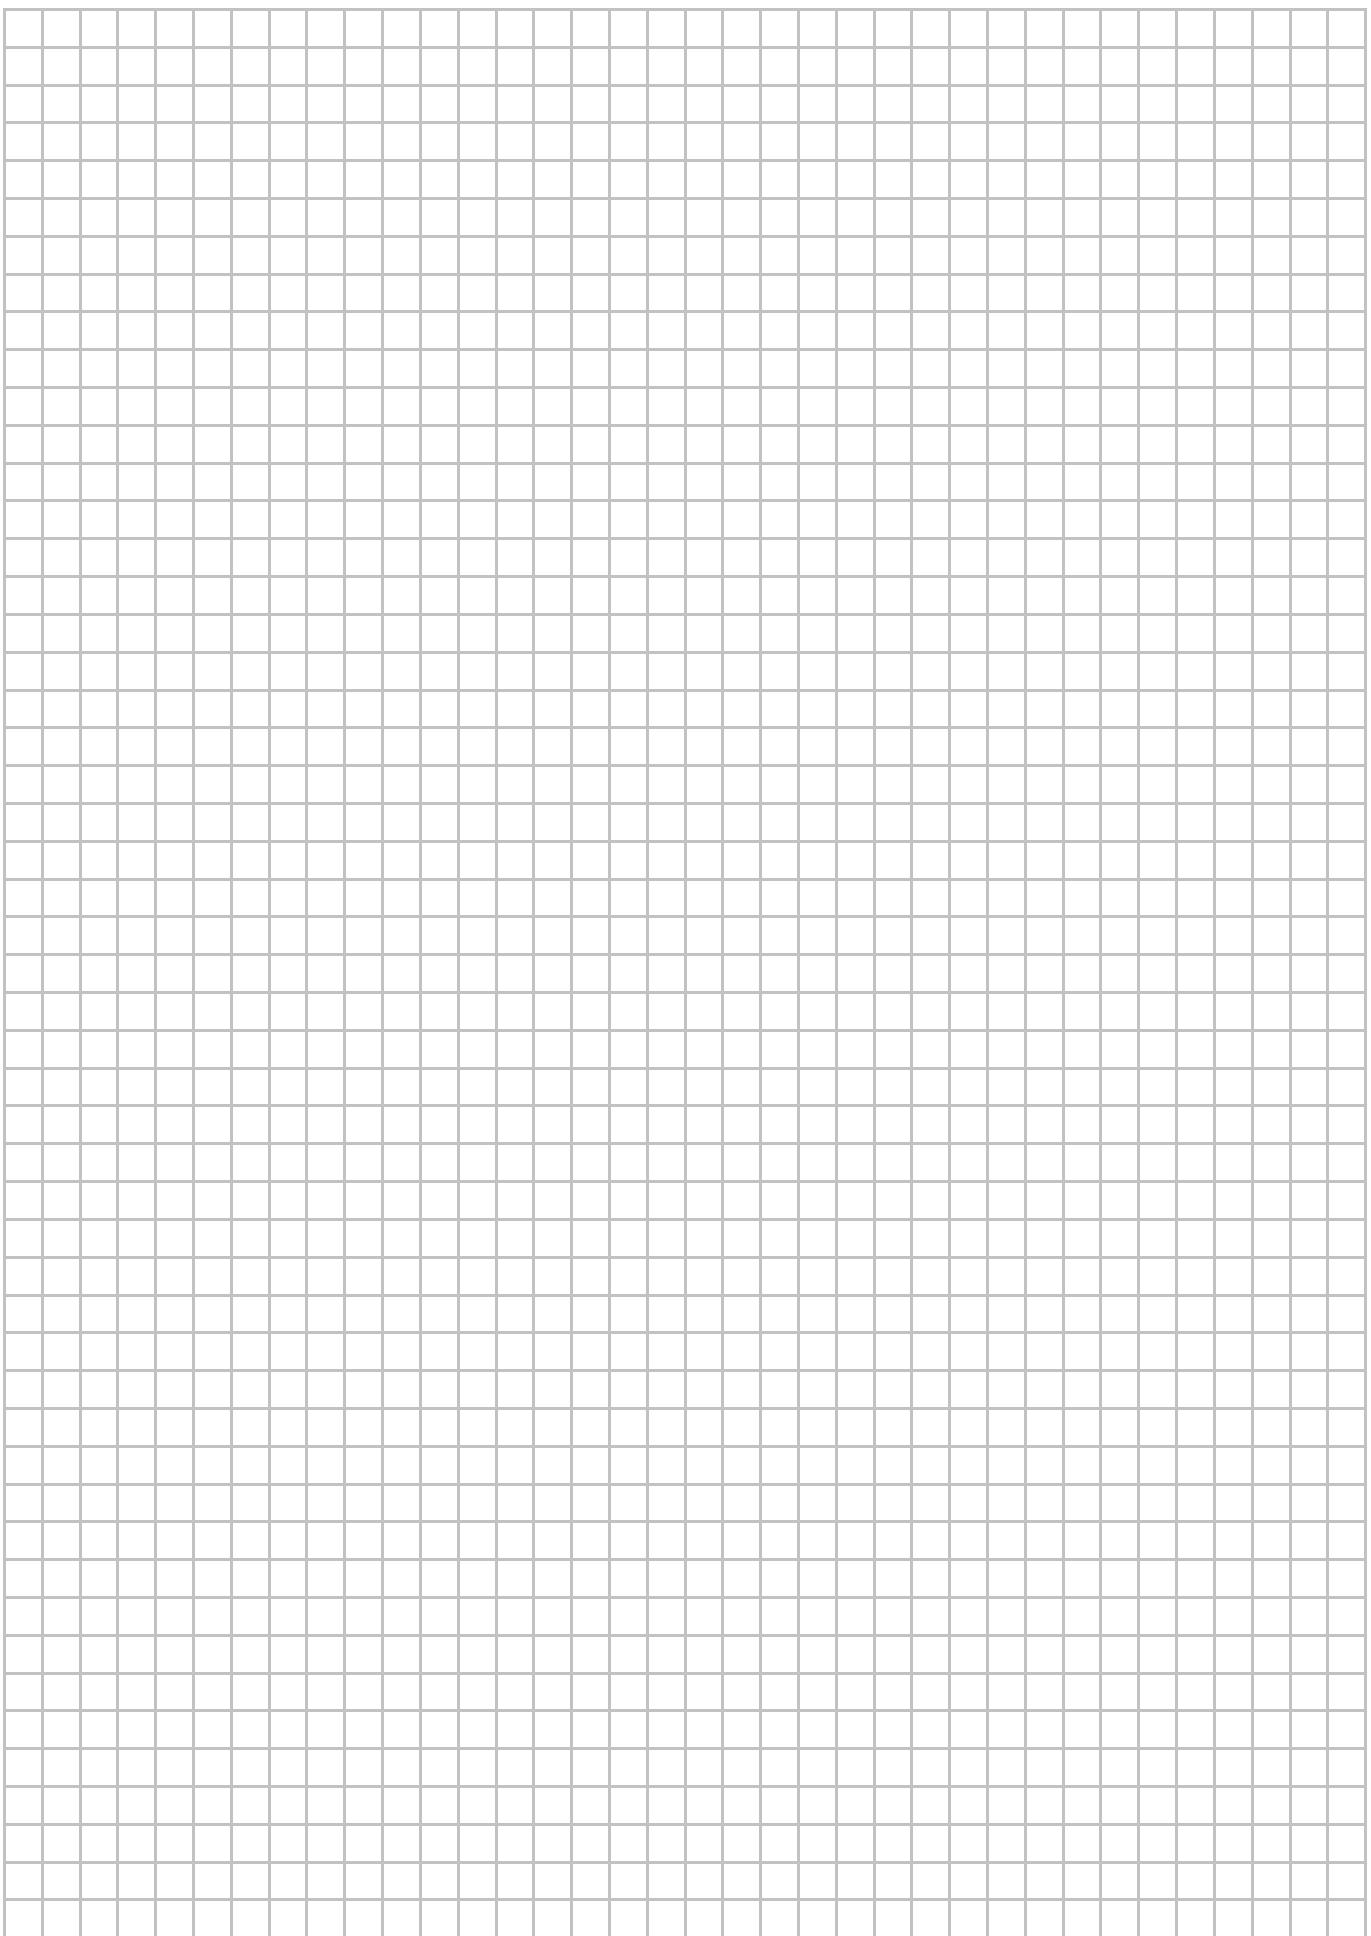

President and Owner

Ljubljana, Slovenia, EU, 2013

Contents

	Class II Modular Multi-pole SPD 20kA and 40kA per pole PROTEC CMG(R) 40, PROTEC CM(R) 80 Series	117
	Class III Modular and Compact Single and Multi-pole SPD PROTEC D(R), DM(R), DMG(R), MPE-MINI, MPE-MINI LED, ZE 200, VTC 10, PROFILT D, PROLED 275 16A Series	125
	Modular and Compact SPD for DC power systems DC PROTEC B(R), DC PROTEC C(R), PROTEC C(R), PROTEC CN(R), PROTEC DMDR, VM-DC, SMH-PS	139
	Class I, II SPD for Photovoltaic systems SAFETEC B(R) PV TCG Series, SAFETEC C(R) PV Series, SAFETEC C(R) PV UL Series, PV PROTEC C(R) series	147
	Class I, II SPD for Wind systems SAFETEC B(R) WT TCG Series, SAFETEC C(R) WT Series, SAFETEC C(R) WT UL Series	161
	PV Combiner Boxes PVCB I, PVCB II Series	169
	AC Boxes PB Series, PROFILT PSF Series	173
	Class II SPD for overhead power lines PROTEC AQ, AQS	177
	Isolating spark gap (ISG) for Equipotential Bonding EPZ 100, EPZ 100 Ex	181
	Connection Accessories	185
	ProGRID series - Power Quality Accessories Surge and Lightning counter family - ProSEC I, II, II+, III, ProLEC I SPD Life-status Monitoring Accessories - ProALARM I, II, ProALYSER, ProSTE, ProSLS	191
	Product index	203

Notes

Common Power Distribution Systems (Europe)

TN-S system

IEC 364-4-41 (1992) designates low voltage distribution systems (networks) using two letters. The first letter describes the grounding method used at the source (i.e. the secondary side of the power distribution transformer). The second letter describes the grounding method used at the consumer's electrical installation for any conductive metal parts.

This method is used to define three basic systems:

TN system;

TT system;

IT system.

Where the abbreviations have the following meaning:

First letter - grounding method used at the source:

T direct connection to ground of the power supply source (star point of transformer secondary winding).

I isolation of power supply source from ground, or connection via a high impedance.

Second letter - grounding method used at exposed conductive parts in the electrical installation:

T exposed conductive parts are directly grounded independent of the eventual existing grounded feeding point

N exposed conductive parts are directly connected to the ground electrode (grounding resistor)

Subsequent prefixes may be used to describe the arrangement of neutral and protective conductors:

S neutral and protective conductor are separated

C neutral and protective conductor are connected

Hence it follows that there are three possible TN sub-systems: TN-S, TN-C and TN-C-S.

Various protective devices may be installed on different distribution systems:

- Over-current protective device (CB, fuses etc),
- Residual protective device (RCD, GFI)
- Insulation monitoring device
- Fault-voltage-operated protective device
- Surge Protective Devices (SPDs)

It is important to ensure that an SPD is correctly selected and co-ordinated with the type of power system used and any over-current protection devices installed. The following protective devices are encountered in the power systems shown:

TN System

- Over-current protective device;
- Residual current protective device

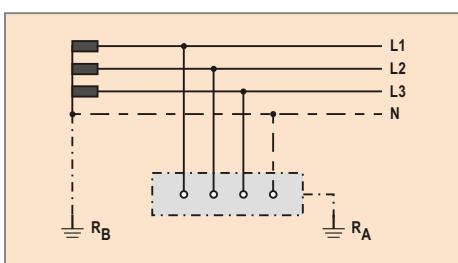

TT System

- Over-current protective device;
- Residual current protective device
- Voltage fault detector

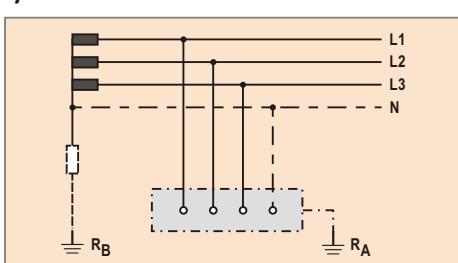

IT System

- Over-current protective device;
- Residual current protective device
- Insulation monitoring device
- Fault-voltage-operated protective device
- Voltage fault detector

TT system

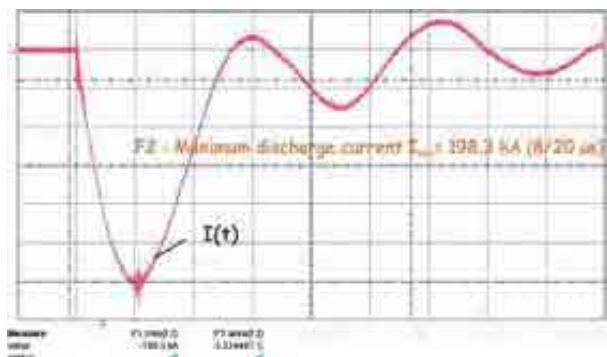

IT system

Common Power Distribution Systems (North America, Asia, Latin America)

Source Configuration	Description	Typical Supply Voltages
	Single-phase 1Ph, 2W+G	110V, 120V, 220V, 240V (L-N)
	Single-phase 1Ph, W+G Also known as Split phase or Edison system	120/240V (L-N / L-L)
	3-phase WYE without neutral 3Ph Y, 4W+G	480V (L-L)
	3-phase WYE with neutral 3Ph Y, 4W+G	120/208V, 220/380V 230/400V, 240/415V 277/480V, 347/600V (L-N / L-L)
	Delta High Leg 3Ph, 4W+G	120/240V (L-N / L-L)
	Delta Ungrounded 3Ph, 3W+G	240V, 480V (L-L)
	Delta Grounded Corner 3Ph, 3W+G	240V, 480V (L-L)

SPD Terminology

Surge Protective Device SPD

A device that is intended to limit transient overvoltages and divert surge currents. It contains at least one nonlinear component.

Maximum continuous operating voltage U_c

The maximum r.m.s. or d.c. voltage, which may be continuously applied to the SPD's mode of protection.

Voltage protection level U_p

A parameter that characterizes the performance of the SPD in limiting the voltage across its terminals, which is selected from a list of preferred values. This value shall be greater than the highest value of the measured limiting voltages.

Residual voltage U_{res}

The peak value of voltage that appears between the terminals of an SPD due to the passage of discharge current temporary overvoltage test value.

Nominal discharge current I_n

The crest value of the current through the SPD having a current waveshape of 8/20. This is used for the classification of the SPD for class II test and also for preconditioning of the SPD for class I and II tests.

Impulse discharge current for class I test I_{imp} (10/350 current impulse)

The crest value of discharge current through the SPD with specific charge transferred Q and specified energy W/R in the specified time.

Combination wave

The combination wave is delivered by a generator that applies a 1.2/50 voltage impulse across an open circuit and an 8/20 current impulse into a short circuit. The voltage, current amplitude and waveforms that are delivered to the SPD are determined by the generator and the impedance of the SPD to which the surge is applied. The short-circuit current is symbolized by I_{sc} . The open-circuit voltage is symbolized by U_{oc} .

TOV Characteristics

Is a behavior of a surge device which is exposed to a temporary overvoltage for a certain time duration. The time can be between 5 seconds and a few weeks.

Combined Arresters

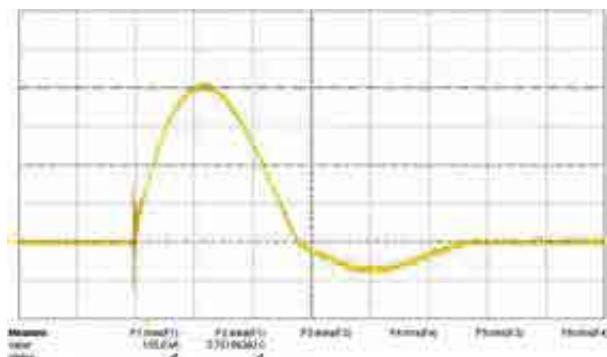

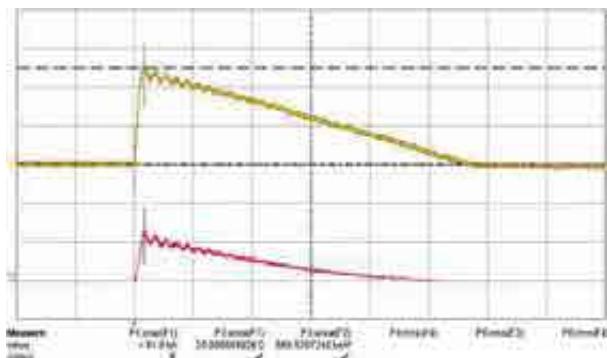

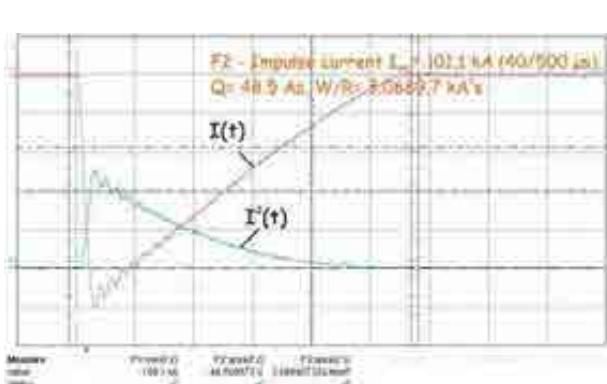

Overvoltage protection device consisting of lightning current arresters and surge arresters.

Maximum discharge current I_{max} for class II test

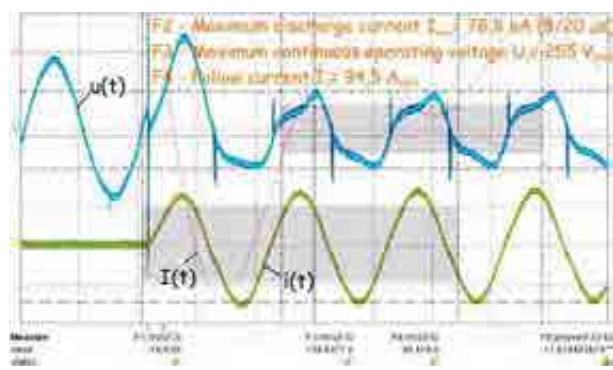

Crest value of a current through the SPD having an 8/20 waveshape and magnitude according to the test sequence of the class II operating duty test. I_{max} is greater than I_n .

1.2/50 voltage impulse

Voltage impulse with a virtual front time of 1.2μs and a time to half-value of 50μs.

SPD Terminology

8/20 current impulse

Current impulse with a virtual front time of $8\mu\text{s}$ and a time to half-value of $20\mu\text{s}$.

Environmental protection provided by enclosure (IP code)

The extent of protection provided by an enclosure against access to hazardous parts, against ingress of solid foreign objects and/or against ingress of water (see IEC 60529).

SPD disconnector

Device (internal and/or external) required for disconnecting a SPD from the power system.

Follow current interrupt rating I_f

Current supplied by the electrical power system and flowing through the SPD after a discharge current impulse. The follow current is significantly different from the continuous operating current I_c .

Back-up fuse

Overcurrent device (for example, circuit-breaker or fuse), which could be part of the electrical installation located externally upstream of the SPD.

Varistor (MOV)

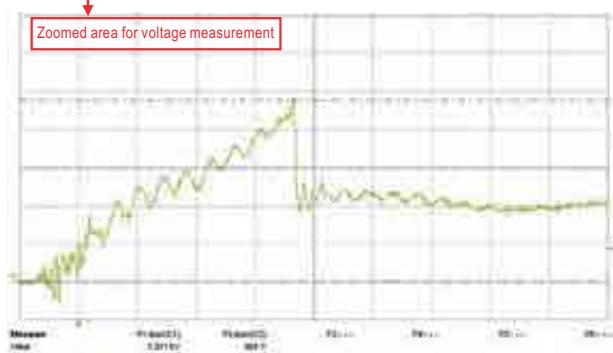

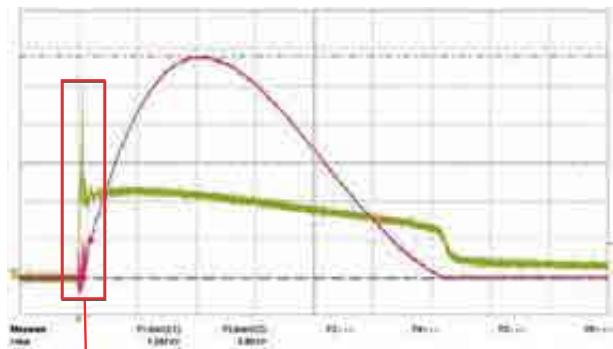

A varistor is a bipolar, non-linear resistor with a symmetrical voltage-current characteristic, where the resistance decreases with an increasing characteristic curve.

Mode of protection of an SPD

An intended current path, between terminals that contains protective components, e.g. line-to-line, line-to-earth, line-to-neutral, neutral-to-earth.

Multipole SPD

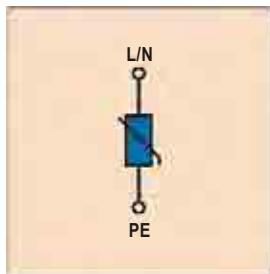

Type of SPD with more than one mode of protection, or a combination of electrically interconnected SPDs offered as a unit

Typical components used in SPDs

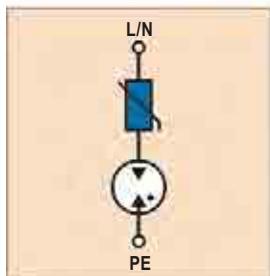

SPD comprising MOV:

- no problems with follow current I_{fi}
- quick response time $t_A (\leq 25\mu s)$ means low residual voltage
- responds well to low overvoltages
- high surge capacity, up to 50kA 10/350 μs

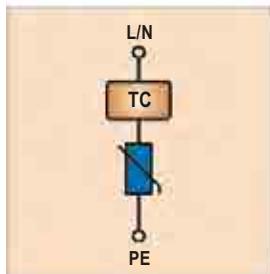

SPD comprising GDT:

- high surge capacity 100kA 10/350 μs
- no exhausting of ionised gases
- used in TT systems as galvanic separation between N-PE conductors

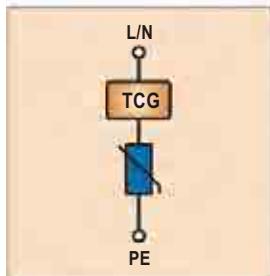

Hybrid SPD comprising both MOV and GDT:

- no follow current I_{fi}
- quick response time $t_A (\leq 25\mu s)$ means low residual voltage
- responds well to low overvoltages
- high surge capacity, up to 25kA 10/350 μs

Hybrid SPD TC:

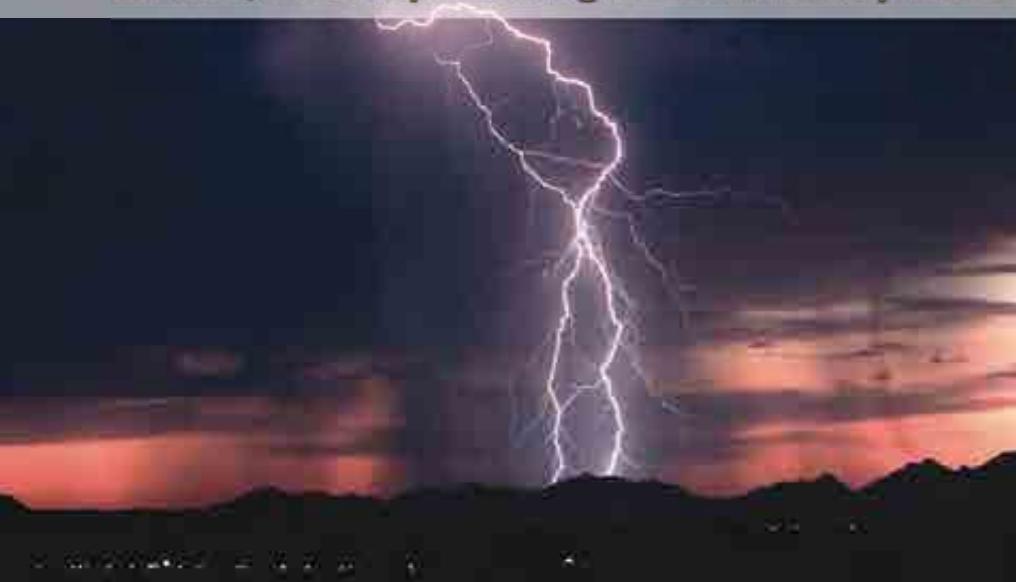

- no follow current I_{fi}
- quick response time $t_A (\leq 25\mu s)$ means low residual voltage
- responds well to low overvoltages
- high surge capacity, up to 25kA 10/350 μs
- TC - Thermal Control Function

Hybrid SPD TCG:

- no follow current I_{fi}
- quick response time $t_A (\leq 25\mu s)$ means low residual voltage
- responds well to low overvoltages
- high surge capacity, up to 25kA 10/350 μs
- TCG - Thermal Control Function without leakage current

Class I, II Compact Single and Multi-pole SPD 12.5kA per pole

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B, C

Location of use:

Main distribution boards

Protection modes:

L/N-PE, L-PEN, L-N, N-PE

Protective elements:

High energy MOV and GDT

Surge discharge rating:

I_{imp} = 12.5kA

Safety:

TOV immunity

Internal protection:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11, UL 1449 3rd Ed.

The new SAFETEC B(R) TCG* and SAFELOC B(R) TCG* series of SPDs :

- Have no impact on the network in normal operation due to no leakage current design
- Are highly reliable - controlled disconnection, arc-quenching
- Are safer - controlled behaviour even when surge ratings are exceeded
- Have longer life - protection against ageing
- Have up to 20 years warranty

SAFETEC B(R) TCG Series:

SAFETEC B(R) 12.5/xxx TCG

SAFETUBE B 50

SAFELOC B(R) TCG Series:

SAFELOC B(R) 25/xxx (2+0) TCG

SAFELOC B(R) 37.5/xxx (3+0) TCG

SAFELOC B(R) 50/xxx (4+0) TCG

SAFELOC B(R) 25/xxx (1+1) TCG

SAFELOC B(R) 50/xxx (3+1) TCG

The SAFETEC B(R) TCG and SAFELOC B(R) TCG series of overvoltage surge protective devices have been developed to protect against partial direct and indirect lightning discharges and are intended to provide protection in zones 0A - 2 per IEC 62305.

All in one protection from overvoltages, surges and transients in accordance to IEC/EN 61643-11.

SAFETEC B(R) TCG and SAFELOC B(R) TCG series consists of separate, high performance varistors and **TCG circuit**, each with a separate disconnection device.

The compact SAFETEC B(R) TCG and SAFELOC B(R) TCG series is suitable for all types of connection. Patented TCG technology prevents catastrophic failures in the case of TOV (temporary overvoltage).

*TCG - Thermal control function without leakage current

SAFETEC B(R) TCG

- Category IEC / EN / VDE: Class I, II / Type 1, 2 / B, C
- Location of use: Main distribution boards
- Network systems: TN-S, TN-C, IT, TT
- Protection modes: L/N - PE, L - PEN
- Protective elements: High energy MOV and GDT
- Surge discharge rating: $I_{imp} = 12.5\text{kA}$
- Safety: TOV immunity
- Leakage current: NO leakage current (TCG)
- Housing: Compact design
- Complies with: IEC/EN 61643-11, UL 1449 3rd Ed.

SAFEBLOC B(R) TCG Series

- Category IEC / EN / VDE: Class I, II / Type 1, 2 / B, C
- Location of use: Main distribution boards
- Network system: TT, TN-S
- Protection modes: L-N, N-PE
- Protective elements: High energy MOV and GDT
- Surge discharge rating: I_{imp} (L-N/N-PE) = 12.5kA/50kA
- Safety: TOV immunity
- Leakage current: NO leakage current (TCG)
- Housing: Compact design
- Complies with: IEC/EN 61643-11, UL 1449 3rd Ed.

Technical data

Class I, II Compact Single and Multi-pole SPD 25kA per pole

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B, C

Location of use:

Main distribution boards

Protection modes:

L/N-PE, L-PEN, L-N, N-PE

Protective elements:

High energy MOV and GDT

Surge discharge rating:

I_{imp} = 25kA

Safety:

TOV immunity

Internal protection:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11, UL 1449 3rd Ed.

The new SAFETEC B(R) TCG* and SAFELOC B(R) TCG* series of SPDs :

- Have no impact on the network in normal operation due to no leakage current design
- Are highly reliable - controlled disconnection, arc-quenching
- Are safer - controlled behaviour even when surge ratings are exceeded
- Have longer life - protection against ageing
- Have up to 20 years warranty

SAFETECB(R) TCG Series:

SAFETECB(R) 25/xxx TCG

SAFETUBE B 50, 100

SAFELOCB(R) TCG Series:

SAFELOCB(R) 50/xxx (2+0) TCG

SAFELOCB(R) 75/xxx (3+0) TCG

SAFELOCB(R) 100/xxx (4+0) TCG

SAFELOCB(R) 50/xxx (1+1) TCG

SAFELOCB(R) 100/xxx (3+1) TCG

The SAFETEC B(R) TCG and SAFELOC B(R) TCG series of overvoltage surge protective devices have been developed to protect against partial direct and indirect lightning discharges and are intended to provide protection in zones 0A - 2 per IEC 62305.

All in one protection from overvoltages, surges and transients in accordance to IEC/EN 61643-11.

SAFETEC B(R) TCG and SAFELOC B(R) TCG series consists of separate, high performance varistors and **TCG circuit**, each with a separate disconnection device.

The compact SAFETEC B(R) TCG and SAFELOC B(R) TCG series is suitable for all types of connection. Patented TCG technology prevents catastrophic failures in the case of TOV (temporary overvoltage).

*TCG - Thermal control function without leakage current

SAFETEC B(R) TCG

- Category IEC / EN / VDE: Class I, II / Type 1, 2 / B, C
- Location of use: Main distribution boards
- Network systems: TN-S, TN-C, IT, TT
- Protection modes: L/N - PE, L- PEN
- Protective elements: High energy MOV and GDT
- Surge discharge rating: $I_{imp} = 25kA$
- Safety: TOV immunity
- Leakage current: NO leakage current (TCG)
- Housing: Compact design
- Complies with: IEC/EN 61643-11, UL 1449 3rd Ed.

Notes

Class I, II Compact Single-pole SPD 35kA and 50kA

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B, C

Location of use:

Main distribution boards

Protection modes:

L/N-PE, L-PEN

Protective elements:

High energy MOV and GDT

Surge discharge ratings:

I_{imp} = 35kA and 50kA

Safety:

TOV immunity

Internal protection:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11, UL 1449 3rd Ed.

The new SAFETEC B(R) TCG* and SAFELOC B(R) TCG* series of SPDs :

- Have no impact on the network in normal operation due to no leakage current design
- Are highly reliable - controlled disconnection, arc-quenching
- Are safer - controlled behaviour even when surge ratings are exceeded
- Have longer life - protection against ageing
- Have up to 20 years warranty

SAFETEC B(R) 35/xxx TCG

SAFETEC B(R) 50/xxx TCG

The SAFETEC B(R) TCG series of overvoltage surge protective devices have been developed to protect against partial direct and indirect lightning discharges and are intended to provide protection in zones 0A - 2 per IEC 62305.

All in one protection from overvoltages, surges and transients in accordance to IEC/EN 61643-11.

SAFETEC B(R) TCG series consists of separate, high performance varistors and **TCG circuit**, each with a separate disconnection device.

The compact SAFETEC B(R) TCG series is suitable for all types of connection. Patented TCG technology prevents catastrophic failures in the case of TOV (temporary overvoltage).

*TCG - Thermal control function without leakage current

SAFETEC B(R) TCG

- Category IEC / EN / VDE: Class I, II / Type 1, 2 / B, C
- Location of use: Main distribution boards
- Network systems: TN-S, TN-C, IT, TT
- Protection modes: L/N - PE, L - PEN
- Protective element: High energy MOV
- Surge discharge rating: $I_{imp} = 35kA$
- Safety: TOV immunity
- Leakage current: NO leakage current
- Housing: Compact design
- Complies with: IEC/EN 61643-11, UL 1449 3rd Ed.

Technical data

Type	SAFETEC B(R) 35/xxx TCG		
	150	275	440
Electrical characteristics			
Max. continuous operating voltage (AC/DC)	U_c	150/200V	275/350V
Nominal discharge current (8/20)	I_n	25kA	
Max. discharge current (8/20)	I_{max}	100kA	
Impulse current (10/350)	I_{imp}	35kA	
Specific energy	W/R	306kJ/Ω

Class I, II Compact Single and Multi-pole SPD 12.5kA per pole

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B, C

Location of use:

Main distribution boards

Protection modes:

L/N-PE, L-PEN, L-N, N-PE

Protective elements:

High energy MOV and GDT

Surge discharge rating:

I_{imp} = 12.5kA

Internal protection and safety:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11

PROTEC B2N(R) Series:

PROTEC B2N(R) 12.5/xxx

PROTUBE B2N 50

PROBLOC BS(R) Series:

PROBLOC BS(R) 25/xxx (2+0)

PROBLOC BS(R) 37.5/xxx (3+0)

PROBLOC BS(R) 50/xxx (4+0)

PROBLOC BS(R) 25/xxx (1+1)

PROBLOC BS(R) 50/xxx (3+1)

The PROTEC B2N(R) 12.5 kA and PROBLOC BS(R) 12.5 kA per pole series of overvoltage surge protective devices have been developed to protect against partial direct and indirect lightning discharges. They are suited for power supply installations and intended to provide protection in zones 0_A - 2 per IEC 62305.

PROBLOC BS(R) is a compact, multi-pole housing design and consists of a high performance varistors with thermal disconnection mechanism.

PROTEC B2N(R) is a compact, single pole housing design and consists of a high performance varistor with thermal disconnection mechanism.

PROTUBE B2N is a compact, single pole housing design and consists of a high energy encapsulated gas discharge tube. It is utilized for galvanic separation between the N and PE conductors in a 1+1 or 3+1 power distribution networks.

PROTEC B2N(R) 12.5 kA and PROBLOC BS(R) 12.5 kA per pole series comply with the IEC/EN 61643-11 standard and are applicable to the following connections: TN-S, TN-C, IT and TT.

PROTEC B2N(R)

- Category IEC / EN / VDE: Class I, II / Type 1, 2 / B, C
- Location of use: Main distribution boards
- Network systems: TN-S, TN-C, IT
- Protection modes: L/N - PE, L- PEN
- Protective element: High energy MOV
- Surge discharge rating: $I_{imp} = 12.5\text{kA}$
- MOV max. withstand capability 1 x 8/20: 80kA
- Housing: Compact design
- Complies with: IEC/EN 61643-11

Notes

Class I, II Compact Single and Multi-pole SPD 25kA per pole

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B, C

Location of use:

Main distribution boards

Protection modes:

L/N-PE, L-PEN, L-N, N-PE

Protective elements:

High energy MOV and GDT

Surge discharge ratings:

Imp up to 50kA

Internal protection and safety:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11

PROTEC BS(R) Series:

PROTEC BS(R) 25/xxx

PROTUBE BS 50, 100

The PROTEC BS(R) 25 kA and PROBLOC BS(R) 25 kA per pole series of overvoltage surge protective devices have been developed to protect against partial direct and indirect lightning discharges. They are suited for power supply installations and intended to provide protection in zones 0A - 2 per IEC 62305.

PROTEC BS(R) is a compact, single pole housing design and consists of a high performance paired varistors, each equipped with separate disconnection mechanism.

PROBLOC BS(R) is a compact, multi-pole housing design and consists of a high performance paired varistors combination, each equipped with separate disconnection mechanism.

PROTUBE BS is a compact, single pole housing design and consists of a high energy encapsulated gas discharge tube. It is utilized for galvanic separation between the N and PE conductors in a 1+1 or 3+1 power distribution networks.

PROTEC BS(R) 25 kA and PROBLOC BS(R) 25 kA per pole series comply with the IEC/EN 61643-11 standard and are applicable to the following connections: TN-S, TN-C, IT and TT.

PROBLOC BS(R) Series:

PROBLOC BS(R) 50/xxx (2+0)

PROBLOC BS(R) 75/xxx (3+0)

PROBLOC BS(R) 100/xxx (4+0)

PROBLOC BS(R) 50/xxx (1+1)

PROBLOC BS(R) 100/xxx (3+1)

Notes

Class I, II Compact Single and Multi-pole SPD up to 50kA per pole

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B, C

Location of use:

Main distribution boards

Protection modes:

L/N-PE, L-PEN, L-N, N-PE

Protective elements:

High energy MOV and GDT

Surge discharge ratings:

Iimp up to 50kA

Internal protection and safety:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11

PROTEC BS(R) 35/xxx
PROTEC BS(R) 50/xxx

The PROTEC BS(R) 35kA, PROTEC(R) 50kA and PROBLOC(R) BS 100kA series of overvoltage surge protective devices have been developed to protect against partial direct and indirect lightning discharges. They are suited for power supply installations and intended to provide protection in zones 0A - 2 per IEC 62305.

PROBLOC BS(R) 100/xxx (1+1)

PROTEC BS(R) 35 consists of single high performance varistor and a paired varistors combination, each with a separate disconnection mechanism.

PROTEC BS(R) 50 consists of two paired, high performance varistors, with a separate disconnection mechanism included.

PROBLOC BS(R) 100 (1+1) consists of two paired, high performance varistors with thermal disconnection mechanism and gas discharge tube.

PROTEC BS(R) 35, PROTEC BS(R) 50 and PROBLOC(R) 100 (1+1) comply with the IEC/EN 61643-11 standard and are applicable to the following connections: TN-S, TN-C, IT and TT.

PROTEC BS(R)

- Category IEC / EN / VDE: Class I, II / Type 1, 2 / B, C
- Location of use: Main distribution boards
- Network systems: TN-S, TN-C, IT
- Protection modes: L/N - PE, L- PEN
- Protective element: High energy MOV
- Surge discharge rating: $I_{imp} = 35kA$
- MOV max. withstand capability 1 x 8/20: 150kA
- Housing: Compact design
- Complies with: IEC/EN 61643-11

Back-up fuse

Class I, II Modular Single and Multi-pole SPD 12.5kA per pole

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B, C

Location of use:

Main distribution boards

Protection modes:

L/N-PE, L-PEN, L-N, N-PE

Protective elements:

High energy MOV and GDT

Surge discharge ratings:

I_{imp} = 12.5kA

Internal protection and safety:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11

PROTEC B2S(R) Series:

PROTEC B2S(R) 12.5/xxx

PROTEC B2S(R) 25/xxx (2+0)

PROTEC B2S(R) 37.5/xxx (3+0)

PROTEC B2S(R) 50/xxx (4+0)

PROTEC B2S(R) 25/xxx (1+1)

PROTEC B2S(R) 50/xxx (3+1)

The PROTEC B2S(R) 12.5 kA per pole series of overvoltage surge protection devices has been developed to protect against partial and indirect lightning discharges. It is suited for power supply installations and intended to provide protection in zones 0_A - 2 per IEC 62305.

The plug-in module / base design facilitates replacement of a failed module *in situ* without the need to remove system wiring.

PROTEC B2S(R) series consists of a high performance paired varistors combination for each pole, equipped with a thermal disconnection mechanism.

PROTEC B2S(R) series complies with the IEC/EN 61643-11 standard and is applicable to the following connections: TN-S, TN-C, IT and TT.

PROTEC B2S(R)

- Category IEC / EN / VDE: Class I, II / Type 1, 2 / B, C
- Location of use: Main distribution boards
- Network systems: TN-S, TN-C, IT
- Protection modes: L/N - PE, L- PEN
- Protective element: High energy MOV
- Surge discharge rating: $I_{imp} = 12.5\text{kA}$
- MOV max. withstand capability 1 x 8/20: 100kA
- Housing: Modular design
- Complies with: IEC/EN 61643-11

Notes

Class II Modular Single and Multi-pole SPD 40kA per pole

Category IEC / EN / VDE:

Class II / Type 2 / C

Location of use:

Sub-distribution boards

Protection modes:

L/N-PE, L-PEN, L-N, N-PE

Protective elements:

MOV and GDT

Surge discharge ratings:

I_{max} up to 40kA

Safety:

TOV withstand for unlimited time

Internal protection:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11

The new SAFETEC series of SPDs :

- Are highly reliable - controlled disconnection, arc-quenching
- Are safer - controlled behaviour even when surge ratings are exceeded
- Have longer life - protection against ageing
- Have up to 20 years warranty

SAFETEC C(R) Series:

The modular SAFETEC C(R) series is suitable for all type of connections.

SAFETEC C(R) 40

Patented TC* technology prevents catastrophic failures in case of TOV (temporary overvoltages).

SAFETUBE C 40

All in one technology is a protection from overvoltages surges and transients. It has been developed to protect against partial direct and indirect lightning discharges and are intended to provide protection in zones OB - 2 per IEC 62305.

SAFETEC C(R) 80 (2+0)

SAFETEC C(R) 120 (3+0)

SAFETEC C(R) 160 (4+0)

SAFETEC C(R) 80 (1+1)

SAFETEC C(R) 160 (3+1)

*TC - Thermal control function

SAFETEC C(R)

- Category IEC / EN / VDE: Class II / Type 2 / C
- Location of use: Sub-distribution boards
- Network systems: TN-S, TN-C, IT, TT (only L-N)
- Protection modes: L/N - PE, L - PEN
- Protective element: MOV and GDT
- Surge discharge rating: I_{max} up to 40kA
- Safety: TOV withstand for unlimited time
- Housing: Modular design
- Complies with: IEC/EN 61643-11

SAFETEC C(R) Series

- Category IEC / EN / VDE: Class II / Type 2 / C
- Location of use: Sub-distribution boards
- Network systems: TN-S, TN-C, IT
- Protection modes: L/N - PE, L- PEN
- Protective element: MOV and GDT
- Surge discharge rating: I_{max} up to 40kA
- Safety: TOV withstand for unlimited time
- Housing: Modular design
- Complies with: IEC/EN 61643-11

Notes

Type 2 Modular Single and Multi-pole SPD up to 50kA per pole

Classification UL 1449 3rd ed.:

Type 2

Location of use:

Sub-distribution boards

Protection modes:

L - G (PE), L - N, N - G (PE) or L - L

Protective elements:

MOV and GDT

Surge discharge ratings:

I_{max} up to 50kA

Housing:

Modular design

Complies with:

UL 1449 3rd Ed.

The new SAFETEC series of SPDs :

- Are highly reliable - controlled disconnection, arc-quenching
- Are safer - controlled behaviour even when surge ratings are exceeded
- Have longer life - protection against ageing
- Have up to 20 years warranty

SAFETEC C(R) UL Series:

The modular SAFETEC C(R) series is suitable for all type of connections.

SAFETEC C(R) UL

Patented TC* technology prevents catastrophic failures in case of TOV (temporary overvoltages).

SAFETEC C(R) (2+0) UL

All in one technology is a protection from overvoltages surges and transients. It has been developed to protect against partial direct and indirect lightning discharges and are intended to provide protection in zones Ob - 2 per IEC 62305.

SAFETEC C(R) (3+0) UL

SAFETEC C(R) (4+0) UL

*TC - Thermal control function

SAFETEC C(R) UL

- Classification UL 1449 3rd Ed.: Type 2
- Location of use: Sub-distribution boards
- Protection modes: L - G (PE), L - N, N - G (PE) or L - L
- Protective element: MOV and GDT
- Surge discharge rating: I_{max} up to 50kA
- Safety: TOV withstand for unlimited time
- Housing: Modular design
- Complies with: UL 1449 3rd Ed.

Class II Modular Single and Multi-pole SPD 40kA per pole

Category IEC / EN / VDE:

Class II / Type 2 / C

Location of use:

Sub-distribution boards

Protection modes:

L/N-PE, L-PEN, L-N, N-PE

Protective elements:

MOV and GDT

Surge discharge ratings:

$I_{max} = 40kA$

Internal protection and safety:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11

PROTEC C(R) Series:

PROTEC C(R) 40/xxx

PROTUBE C 40

PROTEC C(R) 80/xxx (2+0)

PROTEC C(R) 120/xxx (3+0)

PROTEC C(R) 160/xxx (4+0)

PROTEC C(R) 80/xxx (1+1)

PROTEC C(R) 160/xxx (3+1)

The PROTEC C(R) series of overvoltage surge protective devices has been developed to protect low-voltage consumer installation against surges and effects of indirect lightning discharges and induced voltages. They are to be installed within lightning protection zones 0_B - 2 as per IEC 62305.

PROTEC C(R) series consists of a high performance varistor with thermal disconnection mechanism. The plug-in module / base facilitates replacement of a failed module *in situ* without the need to remove system wiring.

PROTUBE C is a modular, single pole housing design and consists of a high energy encapsulated gas discharge tube. It is utilized for galvanic separation between the N and PE conductors in a 1+1 or 3+1 power distribution networks.

PROTEC C(R) series complies with the IEC/EN 61643-11 standards and is applicable to the following network systems: TN-S, TN-C, IT and TT.

PROTEC C(R)

- Category IEC / EN / VDE: Class II / Type 2 / C
- Location of use: Sub-distribution boards
- Network systems: TN-S, TN-C, IT, TT
- Protection modes: L/N - PE, L- PEN
- Protective element: MOV
- Surge discharge rating: $I_{max} = 40kA$
- MOV max. withstand capability 1 x 8/20: 60kA
- Housing: Modular design
- Complies with: IEC/EN 61643-11

Technical data

Notes

Class II Modular and Compact Single-pole SPD up to 40kA

Category IEC / EN / VDE:

Class II / Type 2 / C

Location of use:

Sub-distribution boards

Protection modes:

L/N-PE, L-PEN, N-PE

Protective elements:

MOV and GDT

Surge discharge ratings:

I_{max} up to 40kA

Internal protection and safety:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11

PROTEC C(R) Series - variations:

PROTEC C(R) 20/xxx

PROTEC CN(R) 20/xxx

PROTEC CN(R) 40/xxx

PROTUBE CN 40

PROTEC CG(R) 20/xxx

PROTEC CG(R) 40/xxx

The PROTEC C(R) 20, PROTEC CN(R) and PROTEC CG(R) series of overvoltage surge protective devices have been developed to protect low-voltage consumer installation against surges and effects of indirect lightning discharges and induced voltages. They are installed within lightning protection zones 0B - 2 as per IEC 62305.

PROTEC C(R) consists of a high performance varistor with thermal disconnection mechanism. Plug-in module / base facilitates replacement of a failed module *in situ* without the need to remove system wiring.

PROTUBE CN is a compact, single pole housing design and consists of a high energy encapsulated gas discharge tube. It is utilized for galvanic separation between the N and PE conductors in a 1+1 or 3+1 power distribution networks.

PROTEC CN(R) is a compact, single pole housing design and consists of a high performance varistor with thermal disconnection mechanism.

PROTEC CG(R) consists of a high performance varistor with thermal disconnection mechanism in series with an encapsulated gas discharge tube to limit leakage current. The plug-in module / base design facilitates replacement of a failed module *in situ* without the need to remove system wiring.

PROTEC C(R) 20, PROTEC CN(R) and PROTEC CG(R) series comply with the IEC/EN 61643-11 standards and are applicable to the following network systems: TN-S, TN-C, IT and TT.

PROTEC C(R) 20

- Category IEC / EN / VDE: Class II / Type 2 / C
- Location of use: Sub-distribution boards
- Network systems: TN-S, TN-C, IT
- Protection modes: L/N - PE, L - PEN
- Protective element: MOV
- Surge discharge rating: $I_{max} = 20kA$
- MOV max. withstand capability 1 x 8/20: 40kA
- Housing: Modular design
- Complies with: IEC/EN 61643-11

Technical data

Type	PROTEC C(R) 20/xxx				
	150	275	320	385	440
Electrical characteristics					
Max. continuous operating voltage (AC/DC)	U_c	150/200V	275/350V	320/420V	385/500V
Nominal discharge current (8/20)	I_n			10kA	
Max. discharge current (8/20)	I_{max}			20kA	
Protection level	U_p	< 0.7kV	< 1.2kV	< 1.2kV	< 1.6kV

Class II Modular Multi-pole SPD up to 40kA per pole

Category IEC / EN / VDE:

Class II / Type 2 / C

Location of use:

Sub-distribution boards

Protection modes:

L/N-PE, L-PEN, L-N, N-PE

Protective elements:

MOV and GDT

Surge discharge ratings:

I_{max} up to 40kA

Internal protection and safety:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11

PROTEC CMG(R) 40/xxx (2+0)

PROTEC CM(R) Series:

PROTEC CM(R) 80/xxx (2+0)

PROTEC CM(R) 80/xxx (1+1)

PROTEC CM(R) 80A/xxx (1+1)

The PROTEC CM(R) and PROTEC CMG(R) series of overvoltage surge protective devices have been developed to protect low-voltage consumer installation against surges and effects of indirect lightning discharges and induced voltages. They are to be installed within lightning protection zones 0_B - 2 as per IEC 62305.

PROTEC CM(R) is available in two configurations: 1+1 or 2+0. 1+1 version consists of high performance varistor with thermal disconnection mechanism and an encapsulated gas discharge tube. 2+0 version consists of two high performance varistors with thermal disconnection mechanism. Plug-in module / base facilitates replacement of a failed module *in situ* without the need to remove system wiring.

PROTEC CMG(R) consists of two high performance varistors with thermal disconnection mechanism in series with an encapsulated gas discharge tube to limit leakage current. Plug-in module / base facilitates replacement of a failed module *in situ* without the need to remove system wiring.

PROTEC CM(R) and PROTEC CMG(R) series comply with the IEC/EN 61643-11 standards and are applicable to the following network systems: TN-S, IT and TT.

PROTEC CMG(R) 40 (2+0)

- Category IEC / EN / VDE:

Notes

Class III Modular and Compact Single and Multi-pole SPD

Category IEC / EN / VDE:

Class III / Type 3 / D

Location of use:

Sub-distribution boards, power outlets and/or PCBs

Protection modes:

L/N-PE

Protective elements:

MOV, GDT or EMI filter

Surge discharge ratings:

U_{oc} up to 10kV

Internal protection and safety:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11

PROTEC D(R) 10/xxx

PROTEC DM(R) 20/xxx (2+0)

PROTEC DMG(R) 20/xxx (2+0)

PROLED 275 16A Series

MPE-MINI

MPE-MINI LED

ZE 200-PS

VTC 10/xxx

PROFILT D xxx

SPDs Class I and Class II are not enough to protect sensitive electronic elements.

Overshoot waves are slowly increasing and, at a greater distance, reoccurring and threatening devices. Incidence of low value surges, which are still too high for electronic elements, is still common in the object itself. They are caused by activation/switching of major appliances, inductive devices and motors, industrial systems operation. They intended to provide protection in zones 2 - 3 as per IEC 62305.

The PROTEC D series of oversurge protective devices has been developed to protect against indirect lightning discharges and induced voltages. The plug-in module/base design facilitate replacement of a failed module without the need to remove system wiring etc.

PROLED series is designed for advanced 3-phase devices, equipment and systems up to 16A/230VAC per phase.

MPE series is designed for installation into electrical installation systems, cable ducts and wiring sockets.

ZE 200-PS is designed for plug in to the power outlet.

VTC series is designed for mounting on printed circuit boards (PCBs).

PROFILT D series contains surge arresters and filter, which are connected in serial.

VTC 10

- Category IEC / EN / VDE: Class III / Type 3 / D
- Location of use: PCB
- Network systems: TN-S, TN-C, IT
- Protection modes: L/N - PE
- Protective element: MOV
- Surge discharge rating: U_{OC} = 10kV
- Fault indication: Visual
- Housing: Compact design
- Complies with: IEC/EN 61643-11

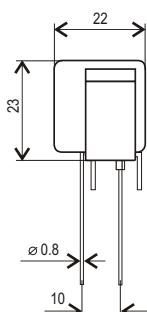

Technical data

Type	VTC 10/xxx			
	150	275	320	440
Electrical characteristics				
Max. continuous operating voltage (AC) U_c	150V	275V	320V	440V
Open circuit voltage of the combination wave generator U_{oc}			10kV	
Max. discharge current (8/20) I_{max}			10kA	
Protection level U_p	< 0.9kV	< 1.4kV	< 1.6kV	< 1.8kV
Follow current I_{fi}			NO	
Response time t_A			< 25ms	
Thermal protection			YES	
Back-up fuse (if mains > 16A)			16A gL	
Mechanical characteristics				
Temperature range	- 40°C + 80°C			
Mounting	On printed circuit board			
Degree of protection	IP 20			
Housing material	Thermoplastic; extinguishing degree UL 94 V-0			
Indication of disconnector operation	Visual

Modular and Compact SPD for DC Power Systems

Category IEC / EN / VDE:

Class I, II, III / Type 1, 2, 3 / B, C, D (IEC/EN 61643-1, 61643-11)

Category IEC / EN:

D1/C1/C2/C3 (IEC/EN 61643-21)

Location of use:

Sub-distribution boards, DC power systems, Low voltage data circuits

Protective elements:

MOV, GDT, diodes

Surge discharge ratings:

I_{max} up to 60kA, I_{imp} up to 10kA

Internal protection and safety:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-1, 61643-11, 61643-21

DC PROTEC B(R) 10/xx

DC PROTEC C(R) 40/xx

PROTEC C(R) 40/75

PROTEC CN(R) 40/75

PROTEC DMDR 20/xxx

VM-DC xx

SMH-PS xx

SPDs for DC power systems have been designed to meet the unique requirements of protection of DC power systems used for telecommunication and railway applications. It provides both, common and differential protection modes. Internal thermal disconnectors are used to eliminate the hazard of thermal runaway fault conditions.

DC PROTEC B(R) 10

- Category IEC / EN / VDE: Class I / Type 1 / B
- Location of use: Sub-distribution Boards
- Protection modes: (+) → PE, (-) → PE, (+) → (-)
- Protective element: MOV
- Surge discharge rating: $I_{imp} = 10kA$
- Housing: Compact design
- Complies with: IEC 61643-1

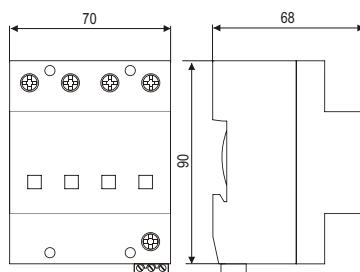

Technical data

Type	DC PROTEC B(R) 10/xx	
	24	48
Electrical characteristics		
Nominal operating voltage	U_n	24V
Max. continuous operating voltage (DC)	U_c	30V
Nominal discharge current (8/20)	I_n	20kA
Max. discharge current (8/20)	I_{max}	60kA
Impulse current (10/350)	I_{imp}	10kA
Protection level	U_p	< 0.6kV
Residual voltage at I_{imp}	U_{res}	< 0.3kV
Follow current	I_{fi}	NO
Response time	t_A	< 25ns
Thermal protection		YES
Short-circuit withstand current	I_{SCCR}	25kA / 50Hz
Mechanical characteristics		
Temperature range		- 40°C + 80°C
Terminal screw torque		max. 3.0Nm
Terminal cross section		35mm ² (solid) / 25mm ² (stranded)
Mounting		35mm DIN rail, EN 60715
Degree of protection		IP 20
Housing material		Thermoplastic; extinguishing degree UL 94 V-0
Indication of disconnector operation		red flag
Remote contacts (RC)		YES
Contact ratings		AC: 250V/0.5A; 125V/3A
Terminal cross section		max. 1.5mm ²

Class I, II SPD for Photovoltaic Systems

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B, C

Location of use:

Photovoltaic systems - PV module side

Protection modes:

(+) → PE, (-) → PE, (+) → (-)

Protective element:

High energy MOV and GDT

Surge discharge rating:

$I_{imp} = 12.5\text{kA}$; I_{max} up to 40kA

Safety:

Ground fault immunity, ground fault withstand

Internal protection:

Separate thermal disconnector for each MOV

Complies with:

EN 50539-11, UL 1449 3rd Ed.

The new SAFETEC PV TCG* series of surge protective devices (SPDs):

- Are highly reliable - controlled disconnection, arc-quenching
- Have no risk of fire in PV system - arc prevention function using rotating disc
- Are safer - controlled behaviour even when surge ratings are exceeded
- Have longer life - protection against ageing
- Have up to 20 years warranty

SAFETEC B(R) PV TCG Series:

SAFETEC B(R) PV TCG series provides common and differential protection mode.

SAFETEC B(R) 12.5/xxxx PV TCG

Patented TCG technology provides high level of reliability and safety in solar PV systems.

SAFETEC B(R) 12.5/xxxx Y PV TCG

A unique indicator monitors all disconnectors and brings up a common status flag if any of current branches fails.

SAFETEC C(R) PV Series:

TCG technology enables high immunity in the case of ground faults in solar PV systems.

SAFETEC C(R) xxxx PV

TCG technology means no leakage current.

SAFETEC C(R) xxxx Y PV

Combination of GDT + MOV prevents intensive ageing of components, thereby prolonging the SPDs life-span.

SAFETEC C(R) xxxx PV UL

Selection of SPDs should adhere to national and international standards.

PV PROTEC C(R) 40/xxxx

*TCG - Thermal control function without leakage current
TC - Thermal control function

SAFETEC B(R) 12.5 PV TCG

- Category IEC / EN: Class I, II / Type 1, 2 / B, C
- Location of use: Photovoltaic systems - PV module side
- Protection modes: (+) → PE, (-) → PE, (+) → (-)
- Protective elements: High energy MOV and GDT
- Surge discharge rating: $I_{imp} = 12.5kA$
- Safety: Ground fault immunity
- Leakage current: NO leakage current (TCG)
- Housing: Compact design
- Complies with: EN 50539-11, UL 1449 3rd Ed.

Technical data

Type	SAFETEC B(R) 12.5/xxxx PV TCG		
	300	600	1000
Electrical characteristics			
Max. continuous operating voltage (DC)	U_{CPV}^*	300V	600V
Nominal discharge current (8/20)	I_n (+) → PE / (-) → PE	12.5kA	
Max. discharge current (8/20)	I_{max} (+) → PE / (-) → PE	40kA	
Impulse current (10/350)	I_{imp} (+) → PE / (-) → PE	12.5kA	
Short circuit withstand	I_{SCPV}	1000A	
Specific energy		39kJ/Ω	
Charge		6.25As	
Protection level	U_p	< 1.1kV	< 1.6kV
Residual voltage at 5kA (8/20)	U_{res}	< 0.8kV	< 1.4kV
Follow current	I_{fi}	NO	
Residual current	I_{PE}	NO	
Response time	t_A	< 25ns	
Thermal protection		YES	
Ground fault immunity (DC)		600V	1200V
Mechanical characteristics			
Temperature range		- 40°C+ 80°C	
Terminal screw torque		max. 3.0Nm	
Terminal cross section		35mm ² (solid) / 25mm ² (stranded)	
Mounting		35mm DIN rail, EN 60715	
Degree of protection		IP 20	
Housing material		Thermoplastic; extinguishing degree UL 94 V-0	
Indication of disconnector operation		red flag	
Remote contacts (RC)		YES	
Contact ratings		AC: 250V/0.5A; 125V/3A	
Terminal cross section		max. 1.5mm ²	
Remote terminal torque		0.25Nm	

* $U_{CPV} \geq 1.2 \cdot U_{OCSTC}$ → open circuit voltage under standard test condition

SAFETEC B(R) 12.5 Y PV TCG

- Category IEC / EN: Class I, II / Type 1, 2 / B, C
- Location of use: Photovoltaic systems - PV module side
- Protection modes: $(+) \rightarrow PE, (-) \rightarrow PE, (+) \rightarrow (-)$
- Protective elements: High energy MOV and GDT
- Surge discharge rating: $I_{imp} = 12.5kA$
- Safety: Ground fault immunity
- Leakage current: NO leakage current (TCG)
- Housing: Compact design
- Complies with: EN 50539-11, UL 1449 3rd Ed.

PV PROTEC C(R) 40/100, 40/550

PV PROTEC C(R) 40/600, 40/1000

Class I, II SPD for Wind Systems

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B+C

Location of use:

Distribution boards

Protection modes:

L/N-PE, L-PEN

Protective elements:

High energy MOV and GDT

Surge discharge ratings:

Imp up to 25kA

Safety:

TOV immunity, TOV withstand for unlimited time

Internal protection:

Separate thermal disconnector for each MOV

Complies with:

IEC/EN 61643-11, UL 1449 3rd Ed.

The new SAFETEC B(R) WT TCG* of surge protective devices (SPDs):

- Are highly reliable - controlled disconnection, arc-quenching
- Are safer - controlled behaviour even when surge ratings are exceeded
- Have longer life - protection against ageing
- Have up to 20 years warranty

SAFETEC B(R) WT TCG Series:

SAFETEC B(R) 12.5/xxx WT TCG

SAFETEC B(R) 25/xxx WT TCG

Patented TCG technology provides high level of reliability and safety in Wind systems.

SAFETEC C(R) xxx (3+0) WT

A unique indicator monitors all disconnectors and brings up a common status flag if any of current branches fails.

TCG technology means no leakage current.

SAFETEC C(R) xxx (3+0) WT UL

Combination of GDT + MOV prevents intensive ageing of components thereby prolonging the SPDs life-span.

Selection of SPDs should adhere to national and international standards.

*TCG - Thermal control function without leakage current
TC - Thermal control function

SAFETEC B(R) 12.5 WT TCG

- Category IEC / EN / VDE: Class I, II / Type 1, 2 / B, C
- Location of use: Main distribution boards
- Network systems: TN-S, TN-C, IT, TT
- Protection modes: L/N - PE, L- PEN
- Protective elements: High energy MOV and GDT
- Surge discharge rating: $I_{imp} = 12.5\text{kA}$
- Safety: TOV immunity
- Leakage current: NO leakage current (TCG)
- Housing: Compact design
- Complies with: IEC/EN 61643-11, UL 1449 3rd Ed.

Technical data

Type	SAFETEC B(R) 12.5/xxx WT TCG	
	440	750
Electrical characteristics		
Max. continuous operating voltage (AC/DC)	U_c	440/580V
Nominal discharge current (8/20)	I_n	12.5kA
Max. discharge current (8/20)	I_{max}	40kA
Impulse current (10/350)	I_{imp}	12.5kA
Specific energy		39kJ/ Ω
Charge		6.25As
Protection level	U_p	< 1.6kV
Residual voltage at 5kA (8/20)	U_{res}	< 1.4kV
Follow current	I_{fi}	NO
Response time	t_A	< 25ns
Thermal protection		YES
Back-up fuse (if mains > 160A)		160A gL
TOV immunity (withstand for unlimited time up to)	U_T	580V
		1000V
Mechanical characteristics		
Terminal screw torque		max. 3.0Nm
Temperature range		- 40°C + 80°C
Terminal cross section		35mm ² (solid) / 25mm ² (stranded)
Mounting		35mm DIN rail, EN 60715
Degree of protection		IP 20
Housing material		thermoplastic; extinguishing degree UL 94 V-0
Indication of disconnector operation		red flag
Remote contacts (RC)		YES
Contact ratings		AC: 250V/0.5A; 125V/3A
Terminal cross section		max. 1.5mm ²
Remote terminal torque		0.25Nm

PV Combiner Boxes for Photovoltaic Systems

Category IEC / EN / VDE:

Class I, II / Type 1, 2 / B, C

Location of use:

Photovoltaic power plants

Protection modes:

(+) → PE, (-) → PE, (+) → (-)

Protective elements:

SPD, fuse, switch, steering diode

Safety:

Ground fault immunity, ground fault withstand

Complies with:

EN 50539-11, prEN 50539-12

PVCB I Series

PVCB II Series

Iskra Zaščite manufactures a range of PV Combiner Boxes for use in Photovoltaic systems. Various models are available including surge protection, DC fuses, DC isolation switches or steering diodes and are compliant with relevant standards such as prEN 50539-12.

Features:

- Waterproof housing IP 65 RAL 7035 with transparent front cover
- Safe and easy installation
- Up to 1500VDC
- Up to 6 strings
- Leakage free version - optional
- String current up to 8A
- Customised designs

PVCB I Series

- Category IEC/EN/VDE: Class I, II / Type 1, 2 / B, C
- Location of use: Photovoltaic power plants
- Surge Protections modes: (+) → PE, (-) → PE, (+) → (-)
- Safety: Overload immunity
- Options: DC fuses, isolation switch, steering diodes
- Housing: IP 65 enclosures
- Complies with: EN 50539-11, prEN 50539-12

Technical data

Notes

Location of use:

Indoor and outdoor

As close as possible to equipment to be protected

Protection modes:

L-N, N-PE

Protective elements:

SPD, surge filter, fuse, MCB

Housing:

Waterproof enclosure (IP 65)

PB Series

The PB series is intended to provide protection for electric appliances and equipment with sensitive electronic components and are installed directly before the protected equipment. Moisture and water resistant enclosures (IP 65) are used.

PROFILT PSF Series

The Profilt PSF series combines Class I and II SPDs, a special low-pass filter and overcurrent protection. The low-pass filter plays an important role in reducing the fast rate of rise (dU/dt) associated with lightning discharges and surge transients. This helps reduce the stress on sensitive electronic components.

Class II SPD for Overhead Power Lines

Category IEC / EN / VDE:

Class II / Type 2 / A

Location of use:

Overhead power lines

Protection modes:

L/N-PE

Protective element:

MOV

Surge discharge ratings:

I_{max} up to 40kA

Internal protection and safety:

Thermal disconnector

Complies with:

IEC/EN 61643-11

PROTEC AQ 25/xxx

PROTEC AQ 40/xxx

PROTEC AQS 40/xxx

The PROTEC AQ series of overvoltage surge protective devices has been developed to protect against indirect lightning discharges on overhead power lines. It consists of a high performance varistor with disconnection device which protects against short circuit conditions.

PROTEC AQS - provides the same compactness as the PROTEC AQ series but with a silicon jacket for greater hermetic sealing properties.

PROTEC AQ 25

Isolating Spark Gaps (ISG) for Equipotential Bonding

Location of use:

Exposed environments or direct burial

Protective element:

GDT

High surge discharge rating:

$I_{max} = 100kA$

Housing:

Corrosion resistant enclosure with hermetic environmental seal and flying leads for ease of connection

Complies with:

IEC 61643-11, EN 50164-3:2004

EPZ 100/xxx
EPZ 100/xxx Ex

The EPZ series of isolating spark gaps have been developed to prevent unsafe potential gradients from establishing between adjacent metallic structures or surfaces during lightning discharges. This is achieved by an internal voltage switching component which operates to establish equi-potential equalisation when its predetermined spark-over voltage is reached, thereby preventing damage to equipment or eliminating unsafe conditions to personnel.

The EPZ has been developed for use in applications such as: lightning protection grounding, where for instance circumstances may dictate that a “clean” signal ground can not be directly connected to a “dirty” power system ground. It has also found wide application in the petrochemical industry in the protection of oil and gas pipeline insulating flanges from flashovers during direct or nearby lightning discharges or when ground faults of nearby power transmission lines can cause large potential gradients across these flanges. The EPZ is available in a hermetically sealed version for direct burial applications. It is also available with Baseefa **Ex approval certificate** for use in hazardous locations.

Surge protection devices for Data/signal lines with Ex certificate are also available. Data sheets are available in catalogue “Surge Protection Devices for Signalling Networks”.

These devices have been developed to meet the requirements EN 50164-3 Lightning Protection Components (LPC) - Requirements for Isolating Spark Gaps, and IEC 62561-3 Ed. 1.0 - Requirements for Lightning Protection Components (LPC) - Part 3: Requirements for isolating spark gaps.

EPZ 100/xxx

Connection Accessories

PROSHORT

PRONET S xx

PROBAR Series

Fixing cable

Fixing hook

PSN

PSI

The PROSHORT is an accessory used with the PROTEC family to provide simple through connections when needed to facilitate wiring installations.

The PRONET S decoupling coil has been developed to establish co-ordination between spark-gap lightning arresters (requirement Class I) and varistor-based surge arresters (Class II).

It is only necessary to install the PRONET S if the distance between lightning arrester and surge arrester at the zone interfaces (total line length) is not more than 7 meters.

Probar series of insulated busbar inter-connects for use with DIN rail products.

Fixing cable and fixing hook are used as fastening devices for PROTEC A overhead lines protection series.

PROSHORT

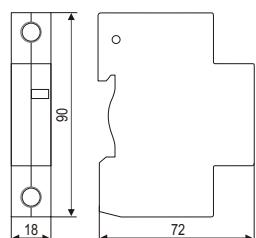

- Category IEC / EN / VDE: Class I, II / Type 1, 2 / B, C

ProGRID Series - Power Quality Accessories

Surge and Lightning counter Family

ProSEC I

ProSEC II+

ProSEC III

} COMING SOON

ProLEC

Surge is a high frequency current event. For any kind of electrical device it presents a potentially dangerous event and can occur in electrical network for number of reasons. The most common cause is a lightning strike, but also switching of inductive loads, operation of industrial equipment, power grid disturbances and general fault or arcing conditions are all capable of producing a surge pulse. In case of a direct lightning strike the damage, caused by surge current, is sometimes clearly felt and visible, but most of other events go by unnoticed. Consequences of such 'quiet' disturbances are not always negligible.

Surge currents can cause loss of data transmission, switch tripping, disturbance of a machine control systems or a slow but noticeable degradation of circuit elements. On the other hand, a surge can be an indicator of a short circuit, inrush currents of power load after a blackout or wiring insulation damage.

The ProSEC family is a series of surge counters with different capabilities that sense and record the otherwise undetectable surge currents. This enables users to take preventive measures and plan maintenance.

SPD Life-status Monitoring Accessories

ProALARM I

ProALARM II

} COMING SOON

ProSLS

ProALYSER

ProSTE

Surge Protective Devices (SPDs) are designed to be self-sacrificial, often failing in order to protect more expensive equipment downstream. SPDs will typically withstand one large surge of their I_{max} (class II) or limp (class I) rating, or many smaller surges. In essence, their life is based on the magnitude and frequency of surges they have diverted. This means, that at some point in time, they will reach the end of their life cycle. This may be due to many small surges, or one large surge which exceeds the specified rating of the SPD. Upon reaching end-of-life, a correctly designed SPD will safely "disconnect" itself from the power supply and equipment is there to protect. Such disconnection usually goes unnoticed, since it is reported only with a visual indication directly on the SPD, which because of its longevity is usually not inspected frequently enough.

With our new SPD life status indication devices, we are making it easier for user to get the information about a failed SPD device immediately, or more importantly, to get a warning when a SPD is nearing its end-of-life. With that, power supply network will never be without SPD protection, which is as important as having the SPD installed in the first place.

ProSEC I

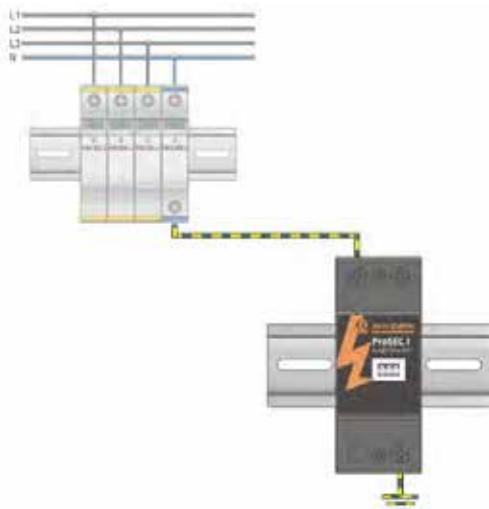

- Mechanical counter
- Self-energizing, no battery power needed
- Permanent record of surge events, non-resettable
- Sensor inside of counter enclosure, uses power contacts for connection
- Sensing surge currents as low as 100A (8/20μs)
- Complies with: IEC/EN 62561-6

Technical data

Type	ProSEC I
Electrical characteristics	
Threshold current (8/20)	I _{tc}
Max. counting discharge current (8/20)	I _{mew}
Mechanical counter	0 - 999
Mechanical characteristics	
Temperature range	- 10°C ... + 60°C
Degree of protection	IP 20
Housing material	Thermoplastic; extinguishing degree UL 94 V-0
Mounting	35mm DIN rail, EN 60715

Installation example

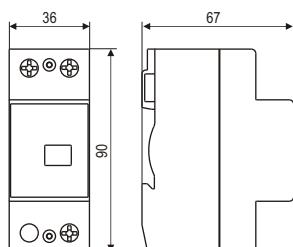

ProSEC I is a surge counter. For its operation it does not need any power supply so no maintenance is needed. It is a simple device, made to sense the lowest surge currents that can disturb the power supply inside a building. It is not possible to reset or set it in any way.

Ordering information

Dimensions

Dimensions, weight and packaging

ProSEC I

Dimensions DIN 43880	2TE
Weight per unit	140g
Packaging dimensions (single unit)	109 x 76.5 x 41.5mm

ProSEC II+

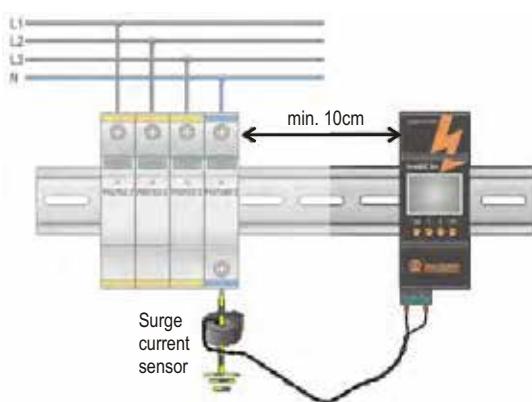

- LCD screen that shows number of surges, hour and date of surge event
- Buttons for TIME/DATE setting and log viewing
- Replaceable battery, battery life minimum 4 years
- Easy to install, Snap-on surge current sensor
- Complies with: IEC/EN 62561-6, 61326-1

Technical data

Type	ProSEC II+	
Electrical characteristics		
Threshold current (8/20)	I _{tc}	50A
Max. counting discharge current (8/20)	I _{mcw}	50kA
Number of event logged		999
Mechanical characteristics		
Temperature range		-20°C ... +70°C
Degree of protection		IP 20
Housing material		Thermoplastic; extinguishing degree UL 94 V-0
Mounting		35mm DIN rail, EN 60715
Replaceable battery (CR123A)		4 years
Max. wired diameter through the current sensor		14mm
Sensor cable		0.5m

Installation example

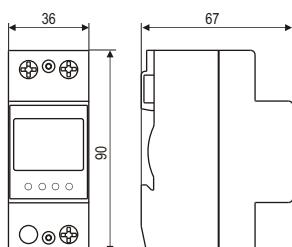

ProSEC II+ is a surge counter with an extra function. Beside surge number count it also logs hour and date for each surge counted. Its surge count and log of previous surges cannot be tampered with, so it can be used for cooperation with insurance companies. With additional time and date logging function, it is now possible to pinpoint the exact time of every surge and correlate it with equipment and power supply problems inside of building.

Weight per unit	150g
Packaging dimensions (single unit)	110 x 83 x 42mm

ProSEC III

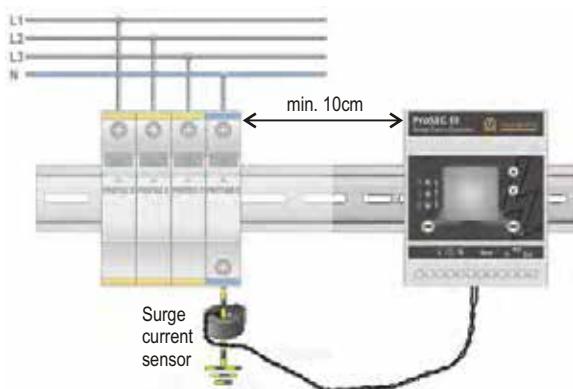

- Color LCD
- Surge counter displaying and logging time/date and current amplitude data
- Remote contact event warning
- "SPD check" warning
- Complies with: IEC/EN 62561-6, 61326-1

Technical data

Type	ProSEC III
Electrical characteristics	
Threshold current (8/20)	I _{tc}
Max. counting discharge current (8/20)	I _{mcw}
Power supply	85 - 264V _{AC} , 100 - 400V _{DC}
Number of stored events	999
Current amplitude resolution	0.5kA
Mechanical characteristics	
Temperature range	- 20°C ... + 60°C
Degree of protection	IP 20
Housing material	Thermoplastic; extinguishing degree UL 94 V-0
Mounting	35mm DIN rail, EN 60715
Max. wired diameter through the current sensor	11mm
Sensor cable	0.5m

Installation example

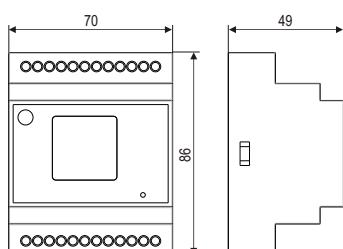

ProSEC III is the new surge current counter, the only one with possibility, to not only sense and log time and date of a surge current event, but to also measure its amplitude. With ProSEC III counter the cause of surge current becomes much more obvious. Therefore, the prediction of possible consequences caused by surges, are easier to assess. We can now make a complete analysis of surge events source and type at the place of measurement and take appropriate precautions and repairs that will keep our equipment and electrical power network in working order.

ProLEC I

- Color LCD
- Surge counter displaying and logging time/date and current amplitude data
- Remote contact event warning
- Complies with: IEC/EN 62561-6, 61326-1

Technical data

Type	ProLEC I
Electrical characteristics	
Threshold current (10/350)	I _{tc}
Max. withstand current (10/350)	I _{mcw}
Number of event logged	999
Current amplitude resolution	5kA
Mechanical characteristics	
Temperature range	-20°C ... +70°C
Degree of protection	IP 65
Housing material	Alu
Mounting	Directly on down-conductor

Installation example

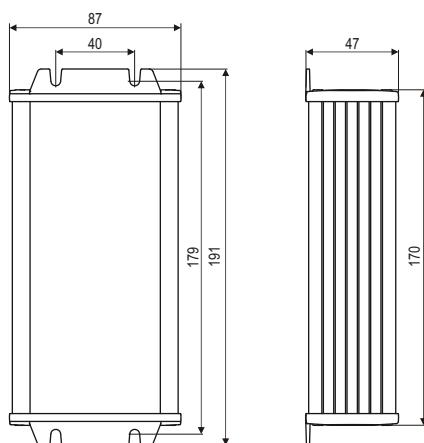

ProLEC I is the first in line of the new lightning current sensors family. It is meant to be used for sensing, measuring and logging lightning discharges that flow through lightning protection systems. ProLEC device is installed directly on lightning down conductor. It is made to withstand currents up to 100kA (10/350). By installing ProLEC on a building's lightning protection system, we gain the knowledge of frequency, magnitude and exact time/date of atmospheric discharges that affected the object. Preventive or maintenance measures can be taken accordingly, depending on information gained from the counter.

 - Device status accessible through WEB user interface
 - Device status alarm through email
 - Additional power supply module is needed (5-30V DC)
 - Complies with: IEC/EN 62561-6

Technical data

Type	ProALARM II
Electrical characteristics	
Communication	Ethernet
Power supply (DC)	5V - 30V
Max. number of directly connected devices	8
Mechanical characteristics	
Temperature range	- 40°C ... + 85°C
Degree of protection	IP 20
Housing material	Thermoplastic; extinguishing degree UL 94 V-0
Mounting	35mm DIN rail, EN 60715

Installation example

ProALARM II is a purpose designed alarm monitoring device, which interfaces with remote contact outputs RC, from many of the products designed by Iskra Zaščite. This monitoring information is conveyed by ProALARM II unit to end-user, or centralized facility monitoring system, by means of a WEB user interface.

ProALARM II can monitor up to 8 individual devices.

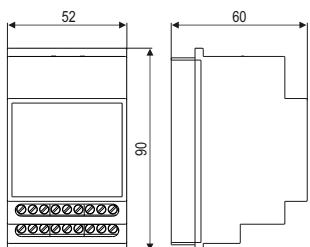

As a member of the Iskra ProGRID series of power quality devices, it is designed to monitor associated devices, such as ProSLS or and SPD device with RC option.

Also other devices that provide voltage-free RC contacts, such as building and fire Alarms, can be monitored with ProALARM II.

Ordering information

Ordering code ProALARM II | 130 560

Dimensions

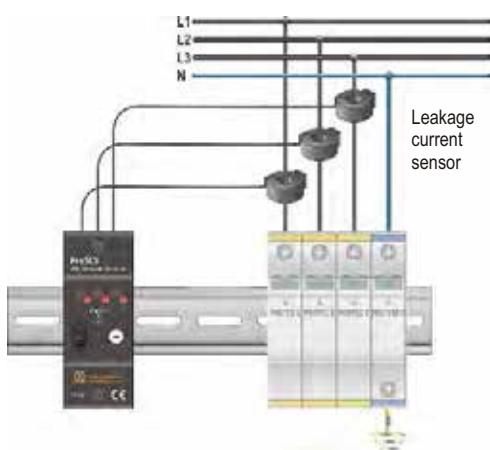

Dimensions, weight and packaging	
ProALARM II	
Dimensions DIN 43880	3TE
Weight per unit	140g
Packaging dimensions (single unit)	106 x 73.5 x 58mm

ProSLS

- Automatic adjustment to all SPD sizes and models
- Sensing zero leakage current of a disconnected SPD
- Compatible with ProALARM II 'communication over ethernet' device
- Three states indication: SPD OK, Change Needed, Failed
- Complies with: IEC/EN 61326-1

**Technical data**

Type	ProSLS
Electrical characteristics	
Lowest measurable current	100µA
Mechanical characteristics	
Temperature range	- 30°C ... + 70°C
Degree of protection	IP 20
Housing material	Thermoplastic; extinguishing degree UL 94 V-0
Mounting	35mm DIN rail, EN 60715
Replaceable battery (CR2477)	8 years
Remote contacts	1A, 125V _{AC} /30V _{DC}

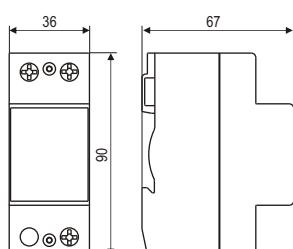

Installation example

ProSLS is a device, that continuously monitors SPD's leakage current, the most accurate predictor of an SPD's life status. According to measured current, ProSLS is able to predict the advanced degradation or a sudden failure of SPD and convey this information to the user.

With a set of remote contacts, ProSLS can be connected to ProALARM II, thus warning the user about SPD state through a web interface.

ProAlyser

- SPD life status and failure indication
- Surge counter, measuring surge amplitude, logging Time/Date of event
- Logging of power quality events
- On-line measuring of electric supply parameters

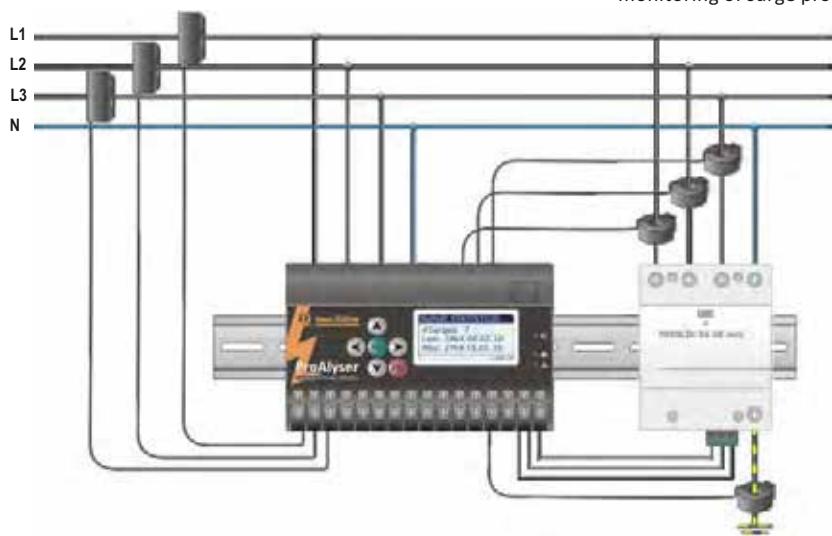

Technical data

Type	ProAlyser
Mechanical characteristics	
Temperature range	- 20°C ... + 70°C
Degree of protection	IP 20
Housing material	Thermoplastic; extinguishing degree UL 94 V-0
Mounting	35mm DIN rail, EN 60715

Installation example

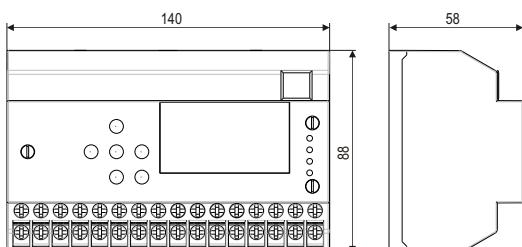

ProAlyser is an advanced SPD status indicator, 3-phase power analyzer and power quality indicator. The device is a powerful but simple to use tool for a complete overview of power supply in a building. Its main function though is an on-line monitoring of surge protection modules life status.

ProSTE

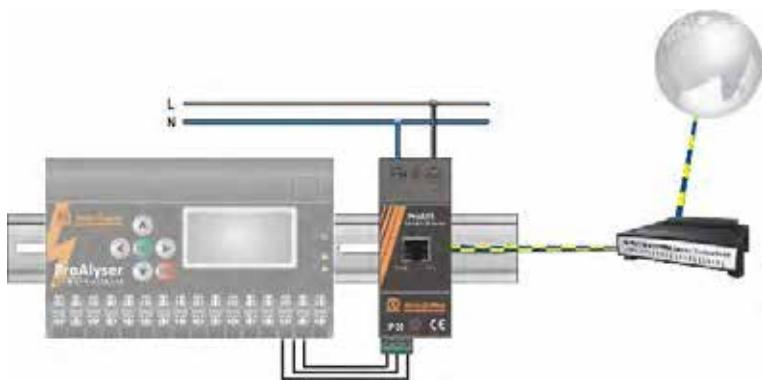

- 10/100Mbps Ethernet
- TCP/UDP/Telnet modes
- DHCP/Static IP modes
- Web or AT command based configuration
- Industrial Temperature Range (-40°C to 85°C)
- Standard and custom baud rates with factory application
- RS-232 capability

**Technical data**

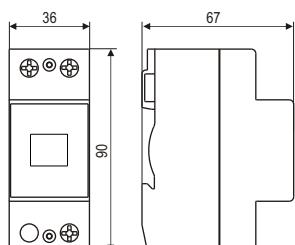

Type	ProSTE
Communication	RS232 to Ethernet
Input	110 - 240VAC / 50 (60Hz)
Mechanical characteristics	
Temperature range	- 40°C ... + 85°C
Degree of protection	IP 20
Housing material	Thermoplastic; extinguishing degree UL 94 V-0
Mounting	35mm DIN rail, EN 60715

Installation example

ProSTE is a Serial-to-Ethernet unit designed to allow legacy industrial devices with only RS232 serial outputs to be directly accessible via an Ethernet connection. This allows monitoring and control of such devices from any network location or even via the Internet.
